EDUCATION

Harvard University

May 2026

Bachelor of Arts in Computer Science, Mind Brain Behavior Track | 3.95 GPA

Cambridge, MA

Coursework: Data Structures and Algorithms, Machine Learning, Systems Programming, Linear Algebra, Probability

Activities and Leadership: Tech for Social Good (Team Lead), Datamatch (Engineering Lead), Harvard Computer Society (Board Member), Teaching Assistant for Data Structures and Algorithms, 2022 Coca Cola Scholar

SKILLS

Languages: Python, Java, C++, JavaScript/TypeScript, React, Next.js, HTML, CSS, PyTorch, TensorFlow, SQL

Technical Skills: AWS (S3, CloudFront, Route 53), Git, CI/CD Deployment, Agile Practices, Unit Testing, E2E Testing

EXPERIENCE

WHOOP

June – August 2024

Software Engineering Intern | Growth Team

Boston, MA

- Developed the highest ROI feature on join.whoop.com in 2024, resulting in 20,000+ new customers.
- Shipped 7 user experience improvements in React, boosting the sales conversion rate by 14% in 3 months.
- Updated Java backend to support free shipping and payment with a pre-saved credit card, reducing average checkout time by 5.5 minutes per customer.
- Engineered dashboard in Next.js to manage A/B testing, saving 500+ developer hours annually.

U.S. General Services Administration

June – August 2023

Software Engineering Intern | Technology Transformation Services

Remote

- Created an HTML/CSS template for displaying long-form content on digital.gov, enabling the publication of 300+ pages of new material adhering to WCAG accessibility standards.
- Developed a novel approach to automating HR data reconciliation in Python, saving 350+ hours annually.
- Selected for Coding It Forward Civic Digital Fellowship (4% acceptance rate).

Formlabs

June – August 2022

Product Intern | Partnerships and Community Team

Remote

- Accelerated growth of the Formlabs Access Initiative, providing access to advanced 3D printing technology for underserved students at 20+ institutions nationwide.
- Collaborated with a cross-functional team of engineers, designers, and external partners to develop a new curriculum for teaching rapid prototyping techniques.
- Forged relationships with 50+ influencers across YouTube, TikTok, and Instagram—boosting site traffic by 15%.

Intelligent Robotics Laboratory, University of Colorado Boulder

June – August 2021

Machine Learning Research Intern | Correll Lab

Boulder, CO

- Trained lightweight neural networks in PyTorch and TensorFlow to classify the location and magnitude of force on prosthetic hands with greater than 85% accuracy.
- Designed an algorithm to interweave rigid and soft filaments in 3D printed actuators, increasing adhesion by 10%.

PROJECTS

Datamatch | *Next.js, TypeScript, Python, MongoDB*

February 2024 – Present

- Spearheaded the largest website overhaul in 25+ years—transitioning the frontend to Next.js and creating 30+ new backend services. Eliminated 5 security vulnerabilities and improved page loading speeds by 18%.
- Managed team of 25+ student developers in an Agile development environment.
- Used by 22,000+ students with 125,000+ matches in 2024. Available at datamatch.me

Crimson Carshare | *React, TypeScript, Next.js, Supabase*

December – January 2024

- Designed and built a platform for Harvard undergraduates to find and share Uber/Lyft rides with each other.
- Used by 100+ students at launch. Available at crimson-carshare.live

CovEducation | *C++, React, Node.js, SQL*

January – August 2023

- Engineered C++ algorithm to match mentors and mentees nationwide, along with a Next.js dashboard for CovEducation affiliates to virtually connect with each other.
- Used by 6,000+ mentors and mentees to date. Available at dashboard.coved.org
